

Declaration of RoHS Compliance

Würth Electronics Midcom Inc. declares that our RoHS products are in compliance with Directive 2002/95/EC of the European Parliament and of the Council of 27 January 2003 on the **R**estriction of the use of certain **H**azardous **S**ubstances in electrical and electronic equipment, including all applicable amendments. The hazardous substances are:

Mercury (Hg ≤ 1000 ppm), lead (Pb ≤ 1000 ppm), cadmium (Cd ≤ 100 ppm), hexavalent chromium (Cr-VI ≤ 1000 ppm), polybrominated biphenyls (PBB ≤ 1000 ppm), and polybrominated diphenyl ethers (PBDE ≤ 1000 ppm).

These substances are not intentionally added but may be present as impurities and do not exceed the maximum allowed value. However, some products may contain lead (Pb) as deemed permissible under the RoHS exemptions, namely:

- *Lead in high melting temperature type solders (i.e. lead-based alloys containing 85% by weight or more lead).*
- *Lead in solders for servers, storage and storage array systems, network infrastructure equipment for switching, signaling, transmission as well as network management for telecommunications.*
- *Lead in electronic ceramic parts (e.g. piezoelectronic devices).*

Product specification sheets that show the status of lead-free/RoHS compliance are available on our website at www.midcom-inc.com.

Würth Electronics Midcom Inc. bases its knowledge of the substance content of its products on information provided by third parties such as suppliers and test laboratories.

Würth Electronics Midcom Inc. makes no warranties, expressed or implied, and assumes no liability in connection with the use of this information.
